Welcome, teacher!

This short guide shows you how to use the India Learns portal as a faculty member. It's written in simple steps — “**click this -> this opens -> do this.**” No technical knowledge needed.

The website: open <https://india-learns-lms.onrender.com> in Chrome (or any browser).

1. Signing in

Your admin will give you an **email** and a **password**.

1. Open the website. You'll see the **Welcome back** screen.
2. Type your **Email address** and **Password**.
3. Click **Sign in**.

You land on your **Dashboard**. That's it — you're in.

First time? Once you're in, change your password (see section 11). **Forgot your password?** Ask your admin — they can reset it and give you a new one.

2. Getting around (the layout)

Every screen has the same frame:

- **Top bar (blue):** the India Learns logo; a bell for notifications; your name; and **Log out** on the right.
 - **Left menu (sidebar), in order:** **Dashboard, Courses, Lesson plans, Showcase, Grading, Feedback, Timetable, Reports, Chat, Announcements** — plus **Profile** and **Notifications** near the bottom.
 - **On a phone:** tap the **menu** button (three lines) at the top-left to open the menu.
-

3. Your Dashboard

When you sign in you see your **Dashboard** — a quick overview:

- Tiles showing **My courses, Classes this week, Awaiting grading, and Students** (across your courses).
 - A **My attendance — today** card where you mark yourself: **Present, Absent, Late, Leave, or Half day**.
 - Quick links: **Mark attendance, Grading queue, Course materials, Timetable, Notifications**.
 - **My courses** and **This week** cards for your classes.
-

4. Your Courses and students

1. In the left menu, click **Courses**. You'll see **My courses** — the courses you're assigned to teach.
2. Click a course. It opens the **course workspace** with tabs across the top: **Overview | Content | Glossary | Reading list | Gradebook | Students | Announcements | Settings**.
 - Each course shows a status: **Sandbox** (still a draft — students can't see it) or **Published** (live to students).
3. To see your class list, click the **Students** tab — you'll see each student's **Code, Name, Email, Enrolled until**.

To post an announcement or set an assignment:

- Click the **Announcements** tab, then click **Open legacy composer**. That page has:
 - an **Announcements** box — type a **Subject** and **Message**, click **Post announcement** (every enrolled student sees it);
 - an **Assignments** section — click **New assignment**, fill in **Title**, **Instructions**, **Due date** and **Max score**, then **Publish assignment**. Later, click **Submissions** to **Grade** each student.
-

5. Add content — videos, PPTs and PDFs

You can upload material for the courses you're assigned to teach.

1. Click **Courses**, click your course, then click the **Content** tab at the top.
2. Click a **session** (a topic row) to open it.
3. In the **Materials** card, click **+ Add material**.
4. Fill in the **Title**, choose the **Type** (**Video**, **PDF**, **Reading**, **Link**, **File**), then **drag your PowerPoint / PDF** into the box (*up to 25 MB*) or paste a **URL**.
5. Click **Add material**.

To add a whole new lesson (topic): on the **Content** tab, open a module and click **+ Add lesson** — type a title (and minutes, if you like), then **Add lesson**. It's added to the bottom of that module and stays there even if the curriculum is re-imported later.

When the whole course is ready for students, click **Publish course** (top of the course workspace).

Big video? The limit is 25 MB. Upload it to Google Drive or YouTube (unlisted) and paste the **link** as the material instead.

Content tab looks greyed out / read-only? You can only edit courses you're **assigned** to. Ask your admin to add you as the teaching faculty for that course.

6. Upload a lesson plan (Word)

If you have a finalized lesson plan in Word, you can build or update your course from it — no need to type lessons one by one.

1. In the left menu, click **Lesson plans**.
2. Choose your **.docx** file. It immediately shows how many modules and lessons it found.
3. Pick the **Target program**.
4. Choose **Create a new course** (give it a name — it's assigned to you as a draft) *or* **Replace an existing course** (only courses you teach appear).
5. If replacing, **type the course name to confirm**, then click the button.

Your file's modules and lessons become the course, exactly as written.

Safety: a course that already has enrolled students, submissions or attendance is protected — the system will refuse to replace it, so live classes can't be wiped by accident. Replaced content is kept (recoverable) rather than destroyed.

7. Grading

1. In the left menu, click **Grading**. You'll see the **Grading queue** — exam attempts waiting for you to mark the written (essay) answers.
2. Click an attempt to open **Grade attempt**.
3. For each essay question, enter a **Score** and a **Comment**.
4. Click **Save grade**.

Multiple-choice answers are graded automatically — you only mark the written parts. Saving locks the grade and notifies the student.

8. Feedback

1. In the left menu, click **Feedback**.
 2. Click **New feedback**.
 3. Choose the **Student** and **Course**, pick the **Level** (Course / Module / Assignment / Assessment), then write a **Summary** and **Detailed feedback**.
 4. Click **Save draft**.
 5. Back on the **Feedback** list, click **Publish** on the draft when you're ready — **students only see published feedback**.
-

9. Timetable

Click **Timetable** to see your weekly class schedule. It's set by the admin and updates automatically.

10. Showcase — present brochures

If you're speaking with a prospective student, you can show the official brochures on screen:

1. In the left menu, click **Showcase**.
 2. You'll see cards: **India Learns — Company Profile** and the **program brochures**.
 3. Click **Present** on a card to open it full-screen.
-

11. Your profile and password

1. Click **Profile** (near the bottom of the left menu).
2. To change your password, find the **Change password** card:
 - Enter your **Current password** and a **New password** (at least 10 characters, with a letter and a digit).
 - Click **Update password**.

You can also update your personal details and emergency contact here.

Quick tips

- Keep the **email and password** your admin gave you safe — and change the password on your first sign-in.
- You can only add content to courses you're **assigned** to teach.
- Use **Log out** (top-right) when you finish on a shared computer.
- The bell shows new notifications (schedule changes, messages).

Need help? Ask your admin, or contact India Learns support (Vidit).
